

DARC Skywarn Net Standby Mode Script

This is **(Your Call Sign)** for the DARC SKYWARN. The National Weather Service has issued (indicate type of Hazardous Weather Watch). At present, there is (*announce all watches and warnings affecting the repeater coverage area*).

The DARC SKYWARN Net is in the stand-by mode at this time and the repeater is open for normal amateur use. We ask that you keep your transmissions short and please wait for the reset tone to allow for breaking stations.

The SKYWARN does not take routine check-ins in a standby-by status; however, any stations that have severe weather reports should call net control at this time.

The National Weather Service is looking for reports of tornadoes on the ground, funnel clouds aloft, hail of any size, damaging winds, flooding (other than normal run-off problems) and any other storm damage. Any report not meeting these criteria should not be passed unless specifically requested by Net Control.

This is **(Your Call Sign)** SKYWARN Net Control, standing by.
